## **DETAILED ACTION**

Page 2

## Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Figure 3, Figure 4, Figure 5, and Figure 6,. The species are independent or distinct because they disclose variants that are not obvious over each other. Figure 3 discloses a suction muffler connector 200 including a connection spring 210 having one end connected to the suction pipe for guiding the refrigerant into the suction muffler, and a connection pipe 220 for shielding an outside circumferential surface of the connection spring. Figure 4 discloses a suction muffler connector 200 with enlarged part 210a at the lower end of the connection spring 210 supports the lower end of the connection pipe 230, to prevent movement of downward movement of the connection pipe 220. Figure 5 discloses a suction muffler connector 200 having a connection pipe 230 with a holding part 220a for inserting the enlarged part 210a. The holding part 220a of the connection pipe 220 is projected outward from an outside circumferential surface of a lower end of the connection pipe, with an annular recess therein for holding the enlarged part 210a of the connection spring 210. Figure 6 discloses suction muffler connector 300 has one end connected to a top end of the suction pipe 150, and the other end having a connection spring 310 extended to the inlet part 110 of the suction muffler 100, a connection pipe 320 surrounding an outside circumferential surface of the connection spring for preventing exposure of the connection spring 310, and a connection cap 330 held both at the top of the connection pipe 320 and the inlet part of

Application/Control Number: 10/814,181 Page 3

the suction muffler. It is preferable that the connection cap 330 is a plastic of an elastic material, such as rubber.

- 2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.
- 3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.
- 4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

  MPEP § 809.02(a).
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Bertheaud whose telephone number is (571) 272-3476. The examiner can normally be reached on M-F 9am 5pm.
- 6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Stashick can be reached on (571) 272-4561. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
